

Freedom of Information Request

Could I have the following information? Since the pandemic began, March 2020, how many serious adverse incidents have been launched by the trust. Please state how many deaths in total covering all SAI's.

How many of those SAI's are pandemic related? And again how many deaths involved?

Between 1 March 2020 and 30 November 2021 - 176 SAIs were reported by NHSCCT to the HSCB; of which 109 involved a death.

There were 6 Covid-related SAIs notified to the HSCB in this time period; of these 3 involved a death. Note: some may have involved more than one death.

Note: data correct at time of reporting and as held on Datix (Trust Risk Management System).
