

## Freedom of Information Request

Inpatients where Method of Admission = CC or CE and Primary Diagnosis not U07.1, or Secondary Diagnosis = U07.1

Ran on: 02/08/2021

- 1) The number of Covid positive inpatients who were admitted to hospitals for a non-Covid reason each month since January 2021. (I am looking for the number of people admitted to hospital who had Covid but was not there because they had Covid, such as admitted after having a heart attack, suffering a traumatic injury. I know the trusts record the number of Covid-19 inpatients but I would like a breakdown of those who are not there for treatment for Covid).
