

Freedom of Information Request

- **Trusts occasionally ask a Royal College to come and review a service; for example they might ask the Royal College of Surgeons to review the orthopaedics service. The review will usually involve a two day visit, a review of various papers and statistics and will result in the college writing a report.**

Please provide any reports written in the last five years by any college. Further information on reviews can be found here: <https://www.aomrc.org.uk/invited-reviews/>.

The Northern Health and Social Care Trust have not made any such requests in the last five years.
